Dr. Day

Week 26: March 11th – March 15th, 2019

Design process – Fair Tests

This week the 5th graders will continue to learn about methods in science and engineering. On Monday we will test our balloon-powered cars that we created last week. As part of this, we will consider what would make a fair test and learn about how variables can affect science and engineering. On Wednesday we will continue to think about what it means to be a scientist by exploring how observations and inferences differ.

Homework:

No homework this week!
