

CROSSROADS ACADEMY
MATH 5

ENTRY REVIEW
SUMMER 2022

Dear Students:

Please complete the enclosed word problems to help you prepare for fifth grade math, and bring the finished packet with you on the first day of school. We do a lot of problem solving in fifth grade, so it is important to keep your skills sharp over the summer! *Hint: Use BAR MODELS!*

It is expected that fifth graders know their multiplication and division tables up to 12. You can use webmathminute.com/sheets to customize and print Mad Minutes so you can practice your basic math facts. Try to do one every day!

Have a great summer!

Mr. Chappuis
Fifth Grade Teacher
